

Leo's Workshop

A Future School by TNS Beaconhouse

Welcome from the HEAD FACILITATOR

Dear Parents,

Every child walks into school with a world of questions, ideas, interests, and possibilities. Our responsibility is not simply to fill that world with information, but to help children make sense of it, ask better questions, consider different perspectives and discover what they are capable of. At Leo's Workshop, this is what learning looks like.

You may find children outside observing birds, investigating why clouds look different, designing something that doesn't work the first time, debating an idea with a friend, or turning a simple question into a project that takes them somewhere unexpected. These moments matter to us because real learning begins when children are curious enough to ask, "Why?", "How?" and "What if?"

We believe children learn best when they have a voice in their learning and when their teachers are not simply delivering answers, but learning alongside them. Our classrooms, therefore, make space for exploration, collaboration, making, reflection and even a little productive mess!

But curiosity alone is not enough. We want our children to develop strong foundations in literacy, mathematics and the sciences while also learning how to think critically, communicate confidently, solve problems, and work with others. We want them to become learners who can adapt, question and create, not just remember.

Most importantly, we want every child to feel known.

Leo's is a small community by design, and that allows us to notice the little things: the question a child keeps returning to, the new interest that suddenly emerges, the quiet confidence that begins to grow, or the moment a child realizes, "I can do this."

If you are looking for a school where your child will not simply be prepared for the next grade, but encouraged to become a curious, capable and thoughtful person, we would love for you to experience Leo's Workshop for yourself.

Sumaiya Zohaib
Head Facilitator
Leo's Workshop

ABOUT LEO'S WORKSHOP

Leo's Workshop is a micro school, that enables children to be lifelong learners by encouraging them to analyze problems, imagine new solutions, and communicate respectfully. We provide a novel, informed approach for your children by personalizing teaching and learning for their needs. This future school by TNS Beaconhouse is authentically child-led and invariably fosters confidence and leadership qualities. Open-space classrooms and mixed-age grouping encourages learning from each other, supported with advanced, technological resources. Multidisciplinary learning enhances curiosity and imagination, focusing on solving real-world problems.

At Leo's Workshop, we draw inspiration from the ingenuity and inventive imagination of great polymaths like Leonardo da Vinci to shape our worldview. Children are not placed into standardised cohorts; our educational philosophy and practice enable children to individually co-construct progression with our learning facilitators.

VISION

Leo's Workshop will enable and empower a community of self-directed learners who are compassionate, innovative and independent thinkers that will help shape their generation's role in the future of society.

MISSION

Leo's Workshop will achieve this by providing an inclusive and caring environment where young people have individual agency and resources to explore their natural curiosity and extend their inquiry about the world they live in. Our multi-grade, experiential learning environment will set the pace for individualized teaching and learning that fosters lifelong learners who are well-equipped to thrive in an unknown future.

CORE VALUES

INNOVATION

In a diverse world, the ability to rethink challenges from multiple perspectives

RESPECT

For all opinions, individuals and the planet

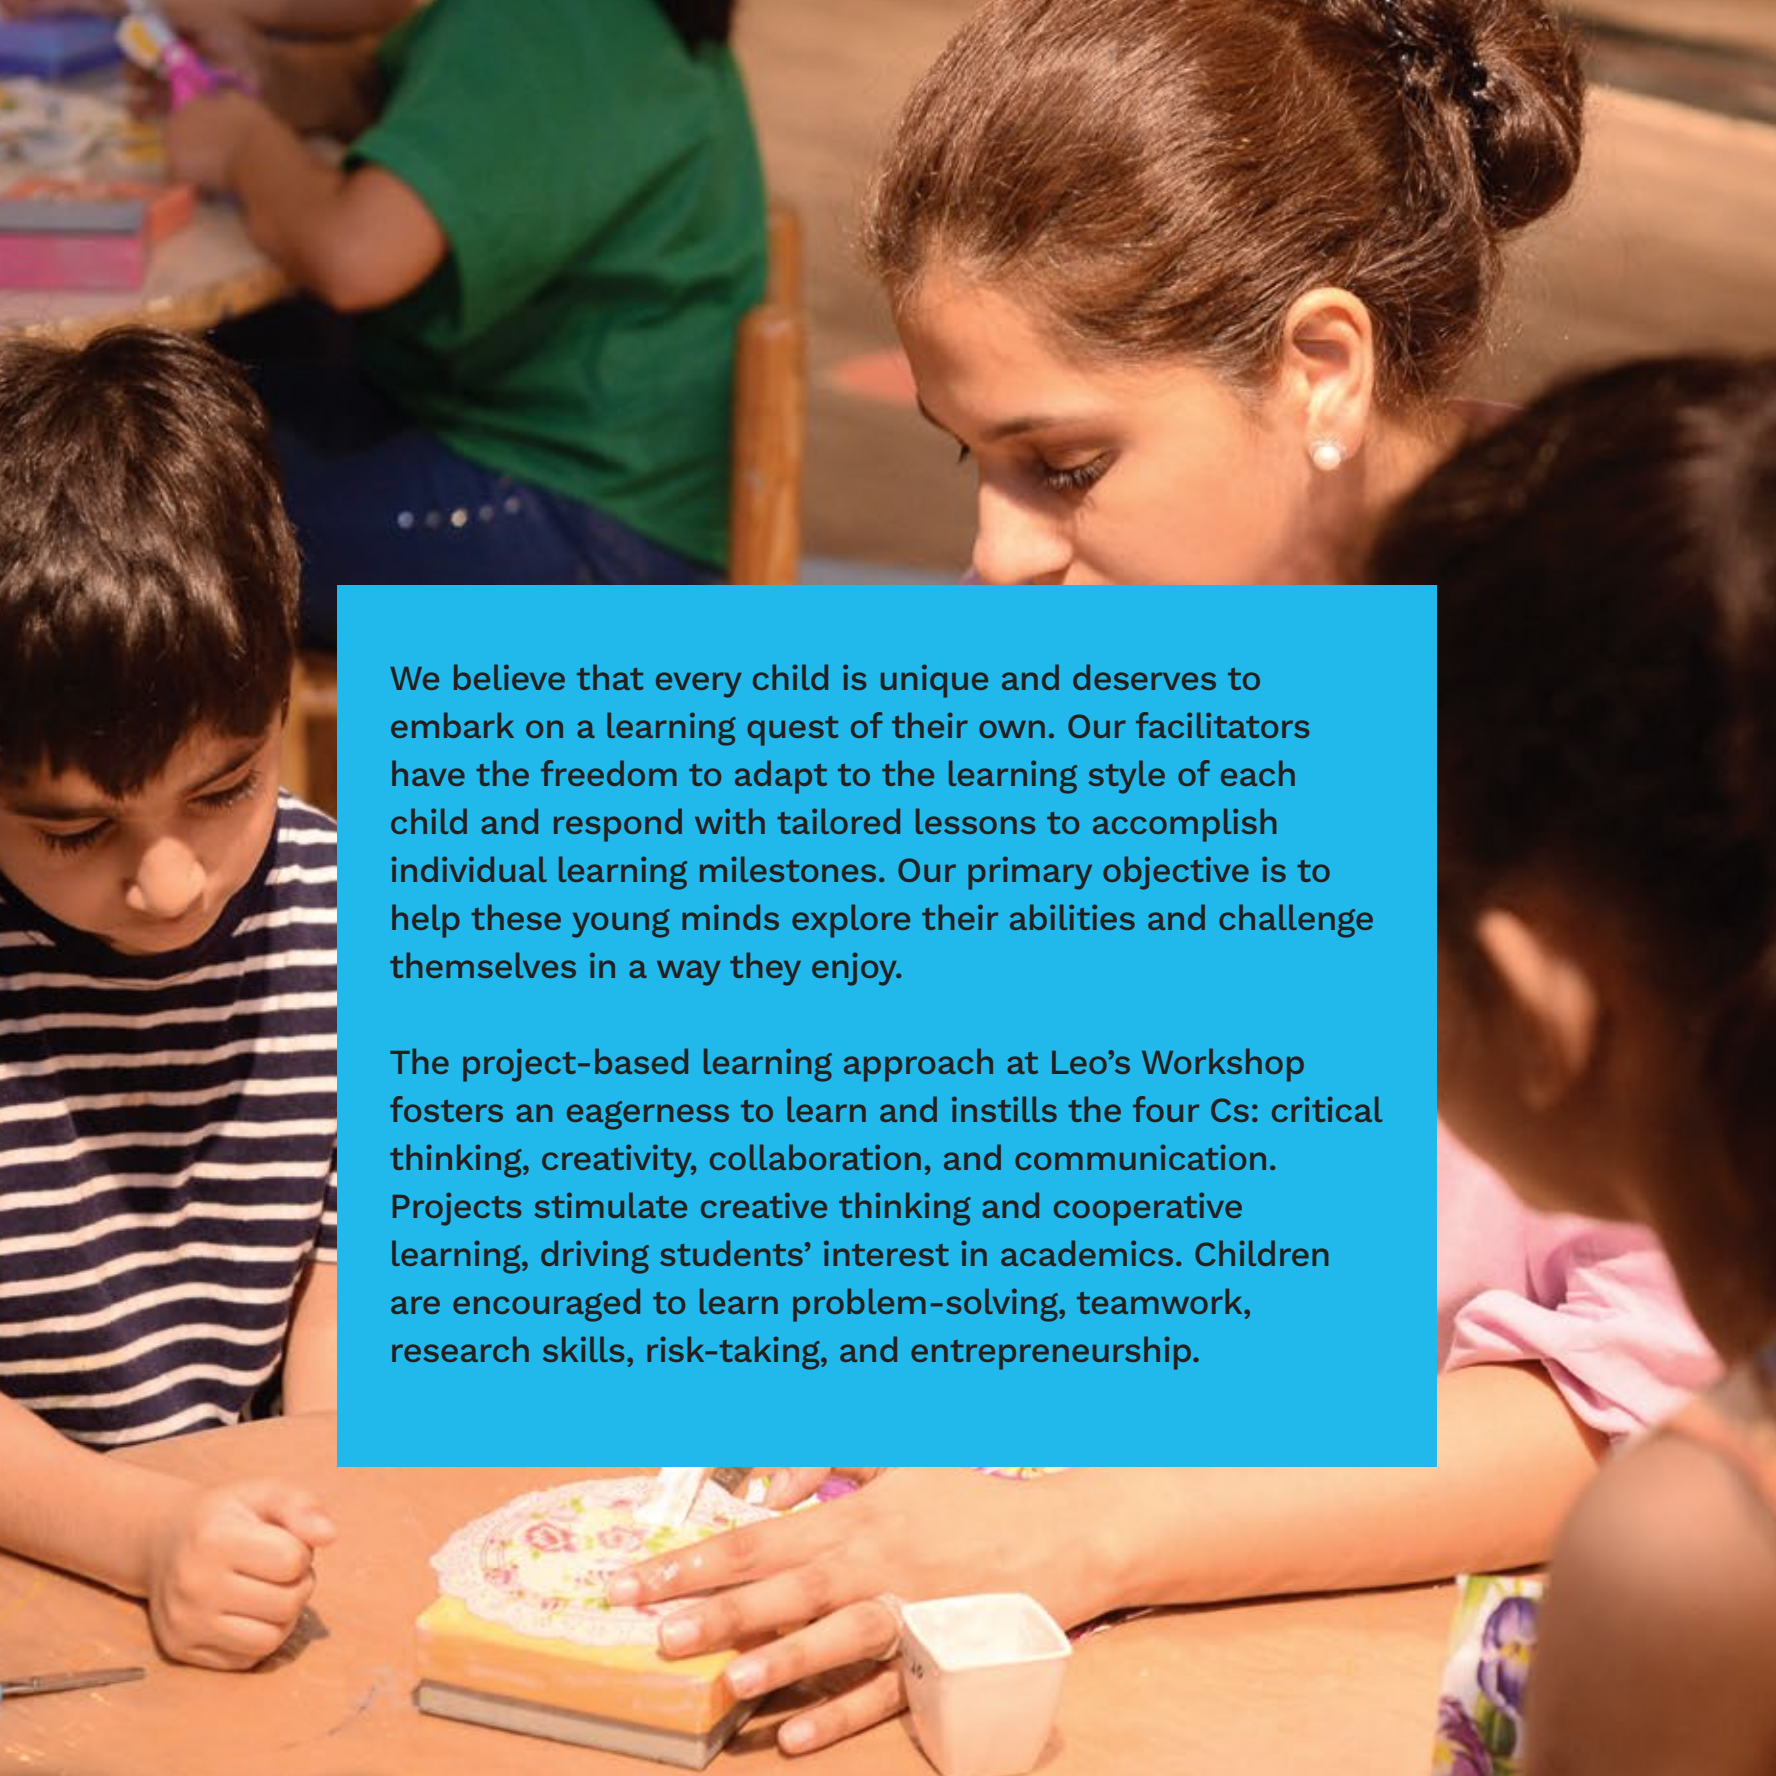

CURIOSITY

An innate desire to acquire knowledge, to explore our cultural identity and inquire about the world around us

WHAT MAKES US DIFFERENT?

We believe that every child is unique and deserves to embark on a learning quest of their own. Our facilitators have the freedom to adapt to the learning style of each child and respond with tailored lessons to accomplish individual learning milestones. Our primary objective is to help these young minds explore their abilities and challenge themselves in a way they enjoy.

The project-based learning approach at Leo's Workshop fosters an eagerness to learn and instills the four Cs: critical thinking, creativity, collaboration, and communication. Projects stimulate creative thinking and cooperative learning, driving students' interest in academics. Children are encouraged to learn problem-solving, teamwork, research skills, risk-taking, and entrepreneurship.

An overhead view of two young children sitting on a light-colored wooden floor, focused on a project. They are surrounded by vibrant, thick paint strokes in various colors like green, orange, yellow, and blue. One child, wearing a dark blue shirt, is reaching for a small object on the floor. The other child, in a yellow shirt, is also reaching down. A blue bowl filled with colorful buttons sits on a white sheet of paper that has some black lines drawn on it. The scene is bright and creative.

OUR PHILOSOPHY

Our philosophy of learning is based upon ‘truths’ that enable the child to learn effectively. These guiding principles are as follows:

Multidisciplinary Project-based Learning

From a young age, children experience how to integrate learnings in their projects from multiple disciplines to understand and resolve complex real-world issues. Students engage with renowned professionals who mentor them on their projects.

Discovery with Passion and Purpose

Our child-led, transformative learning process facilitates your child’s journey of discovery, a key first step in becoming a life-long learner.

Child-led Self-paced Learning

Students establish their own learning goals with our facilitators.

Try-Fail-Learn-Repeat

We provide a conducive environment for children to try, fail, and try again in their transformative learning journey.

Children Creating the Future

We value the importance of inculcating leadership qualities. At Leo’s Workshop, we facilitate your child’s ability to inspire others by effectively communicating ideas and demonstrating strong decision-making skills.

OUR APPROACH TO **LEARNING**

Our learning approach shapes young minds during formative years, by enhancing visual, auditory, reading/writing, and kinesthetic skills. At Leo's Workshop, we let children simply be themselves. Walk in, and you'll find children sitting at tables or knee-to-knee in small groups engaged in lively chatter and exchanging free flowing ideas. Each child learns at their own pace, in a way that reflects their individual abilities.

LEARNING METHODOLOGY

Project-based learning (PBL) is a pedagogical approach which develops skills and knowledge by facilitating inquiry into real-world challenges. Children are encouraged to research and collaborate on authentic and engaging projects that are contextual and solution-oriented. At Leo's Workshop, facilitators encourage children to learn independently, explore their interests and develop a deeper understanding of concepts. At Leo's, we nurture social awareness, empathy, critical thinking, and decision making. The PBL approach is designed to nurture social awareness, empathy, critical thinking, decision making and an avid interest in lifelong learning.

To ensure that children engage in quality project-based learning, Leo's Workshop has built its learning methodology around the research-based Gold Standard PBL model.

OUR STUDIOS

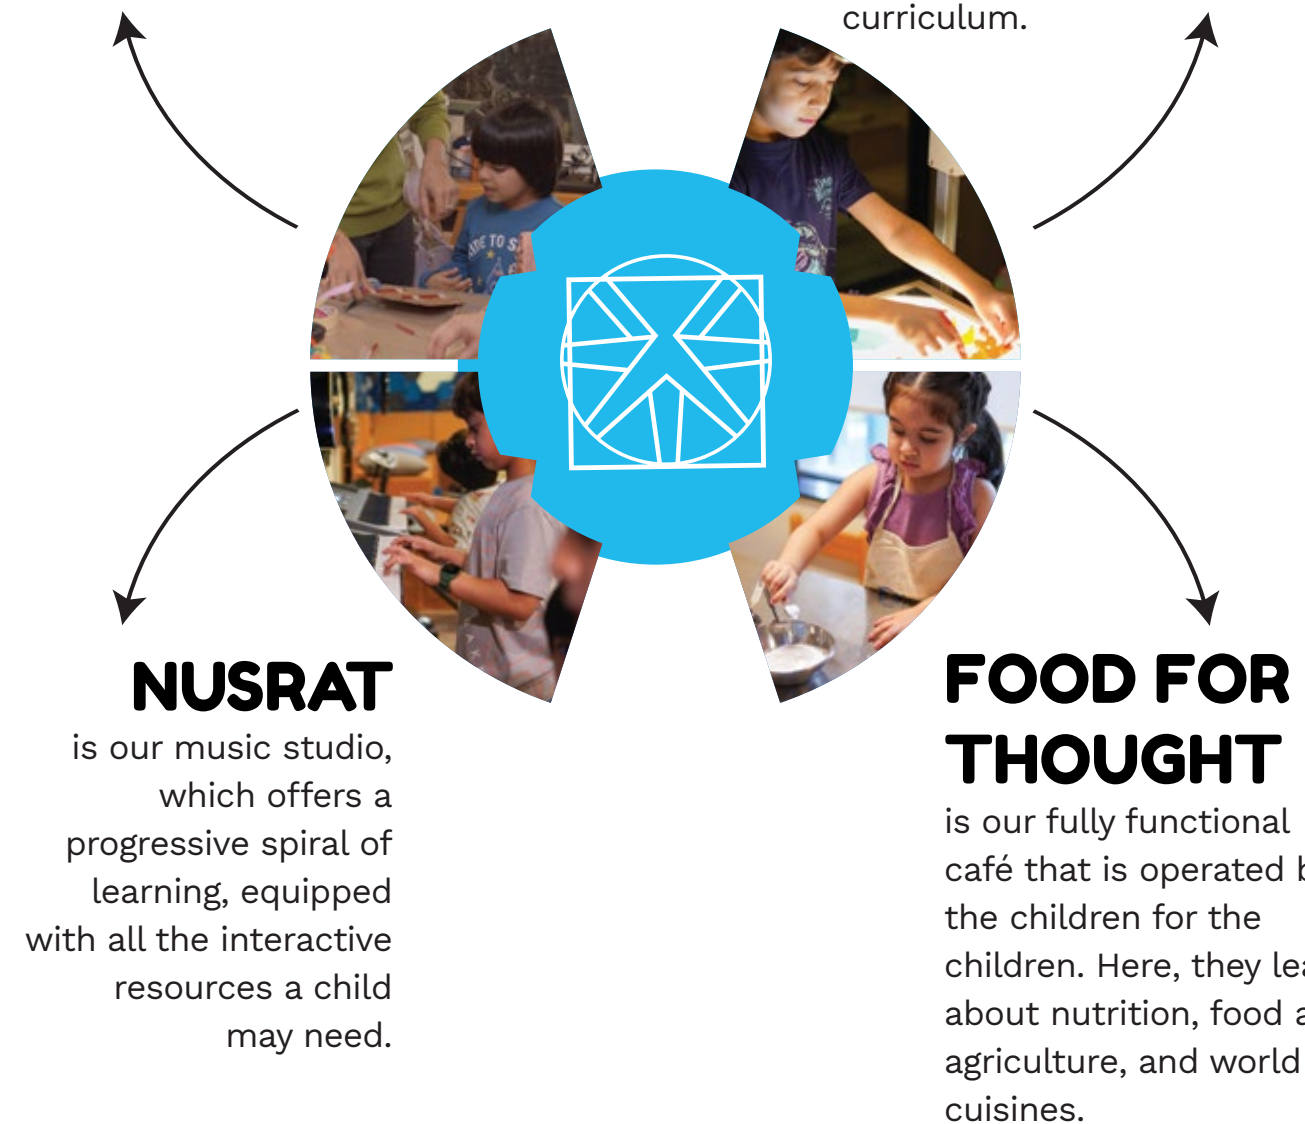

We are creating a school of tomorrow with open, collaborative spaces that inspire students to extend their inquiry and dig deeper. Our studios act as the ideal space for the artist, innovator, thinker, inquirer, scientist, and even the philosopher in every growing child. The studios complement the learning approach with maximized participation and inclusion, improving children's self-esteem and motivation. Additionally, they create a platform for interdisciplinary teaching and learning by integrating mathematics with music, science with art, economics and entrepreneurship to prepare students for the future.

MAKER'S STUDIO

features 3D printers, laser cutters, carpentry stations, robotics, AI and coding equipment. Through hands-on STEAM learning, students develop technical expertise, critical thinking, problem-solving skills, creativity, communication and collaboration skills, preparing them for future careers.

NŪR

is the media center of the school, and offers unique technology-driven curriculum rarely found in K-5 schools. The media center offers students and faculty a variety of modern digital resources, including video, music, photography, graphic design and web design capabilities, which they can integrate into educational projects and curriculum.

EARLY YEARS

All children are natural inquirers; during the early years, they are curious about the world around them, and this curiosity must be nurtured. They need challenging experiences and further development of skills that will help guide their inquiry.

Our Early Years program, 'Inquirers', holistically develops a child's social, emotional, cognitive and physical needs to build a solid and broad foundation for lifelong learning and wellbeing. This level includes Nursery, Reception, and Kindergarten. Children's interests are monitored, and their journeys are documented. A trained facilitator then uses these records to create meaningful learning opportunities.

LOWER PRIMARY

Building on the knowledge acquired in the inquiry stage, at the core of our Lower Primary program is a commitment to developing children's social and emotional skills while continuing to create an inquiring and critical mind. This level, called 'Builders', includes Years 1 and 2, where children learn how to interact with kindness and empathy with others in a shared multi-aged space. This unique setting allows children to explore beyond what they are 'supposed' to learn and encourages them to extend their abilities and build their own unique perspectives. Because children are not bound by books of only their grade level, they have opportunities to excel in areas of their particular interest. We strongly believe each child has the potential to excel and that it is the facilitator's job to help the student reach that potential.

UPPER PRIMARY

Critical thinking is essential for engaging children and cultivating curiosity, persistence, flexibility, reflectiveness and collaborative problem-solving.

The Upper Primary level, 'Thinkers', includes Years 3, 4 and 5. By this stage, children are well-trained to make critical decisions, have a voice and choice in their learning and be able to communicate these choices and decisions in a logical and cohesive manner.

Our aim is to scaffold children's learning in a way that nurtures a natural drive to acquire knowledge and, more importantly, the ability to apply it. Children are encouraged to become globally aware, culturally sensitive, and open-minded citizens who celebrate the diversity of cultures and beliefs. They are also encouraged to become balanced individuals with a wide range of sporting, artistic, academic, and cultural interests. There are multiple opportunities for each child to express their individuality, both academically and through extracurricular activities

THE ADMISSION PROCESS

1

Connect with us

We welcome you to explore the magic that happens at Leo's Workshop and discover how we engage a child with experiential learning.

2

Schedule a tour

You can schedule an enriching tour of the school and even observe a class to better understand the learning methodology.

Additionally, your child will have the opportunity to spend time in a classroom, while you meet with the Head Facilitator.

3

Submit the Admissions Form

Submit your completed form to our office with a non-refundable fee of Rs 6500. If your child is currently enrolled at another school, we require the latest term report or if he/she has already left the previous school, a School Leaving Certificate is to be submitted.

4

Schedule a Baseline Assessment

For children between the ages of 3-5 years, this is an hour-long informal meeting with the child's facilitator, this will help us gauge the child's interests and social skills so we can design a customized learning plan for your child.

Children aged between 6-11 years are assessed on numeracy, literacy, and social sciences. The assessment can last up to two hours. This helps us create a customized learning plan and ensures that we place the child appropriately.

5

Parent and Child Orientation

Once your child has been granted admission, we require parents to attend our orientation class. This familiarizes you with the school's philosophy, approach, handbook of policies and the personalized education plan.

6

Learning Begins!

We are excited to have you on board for a mutually joyous journey.

ABOUT BEACONHOUSE GROUP

Leo's Workshop is part of the Beaconhouse Group.

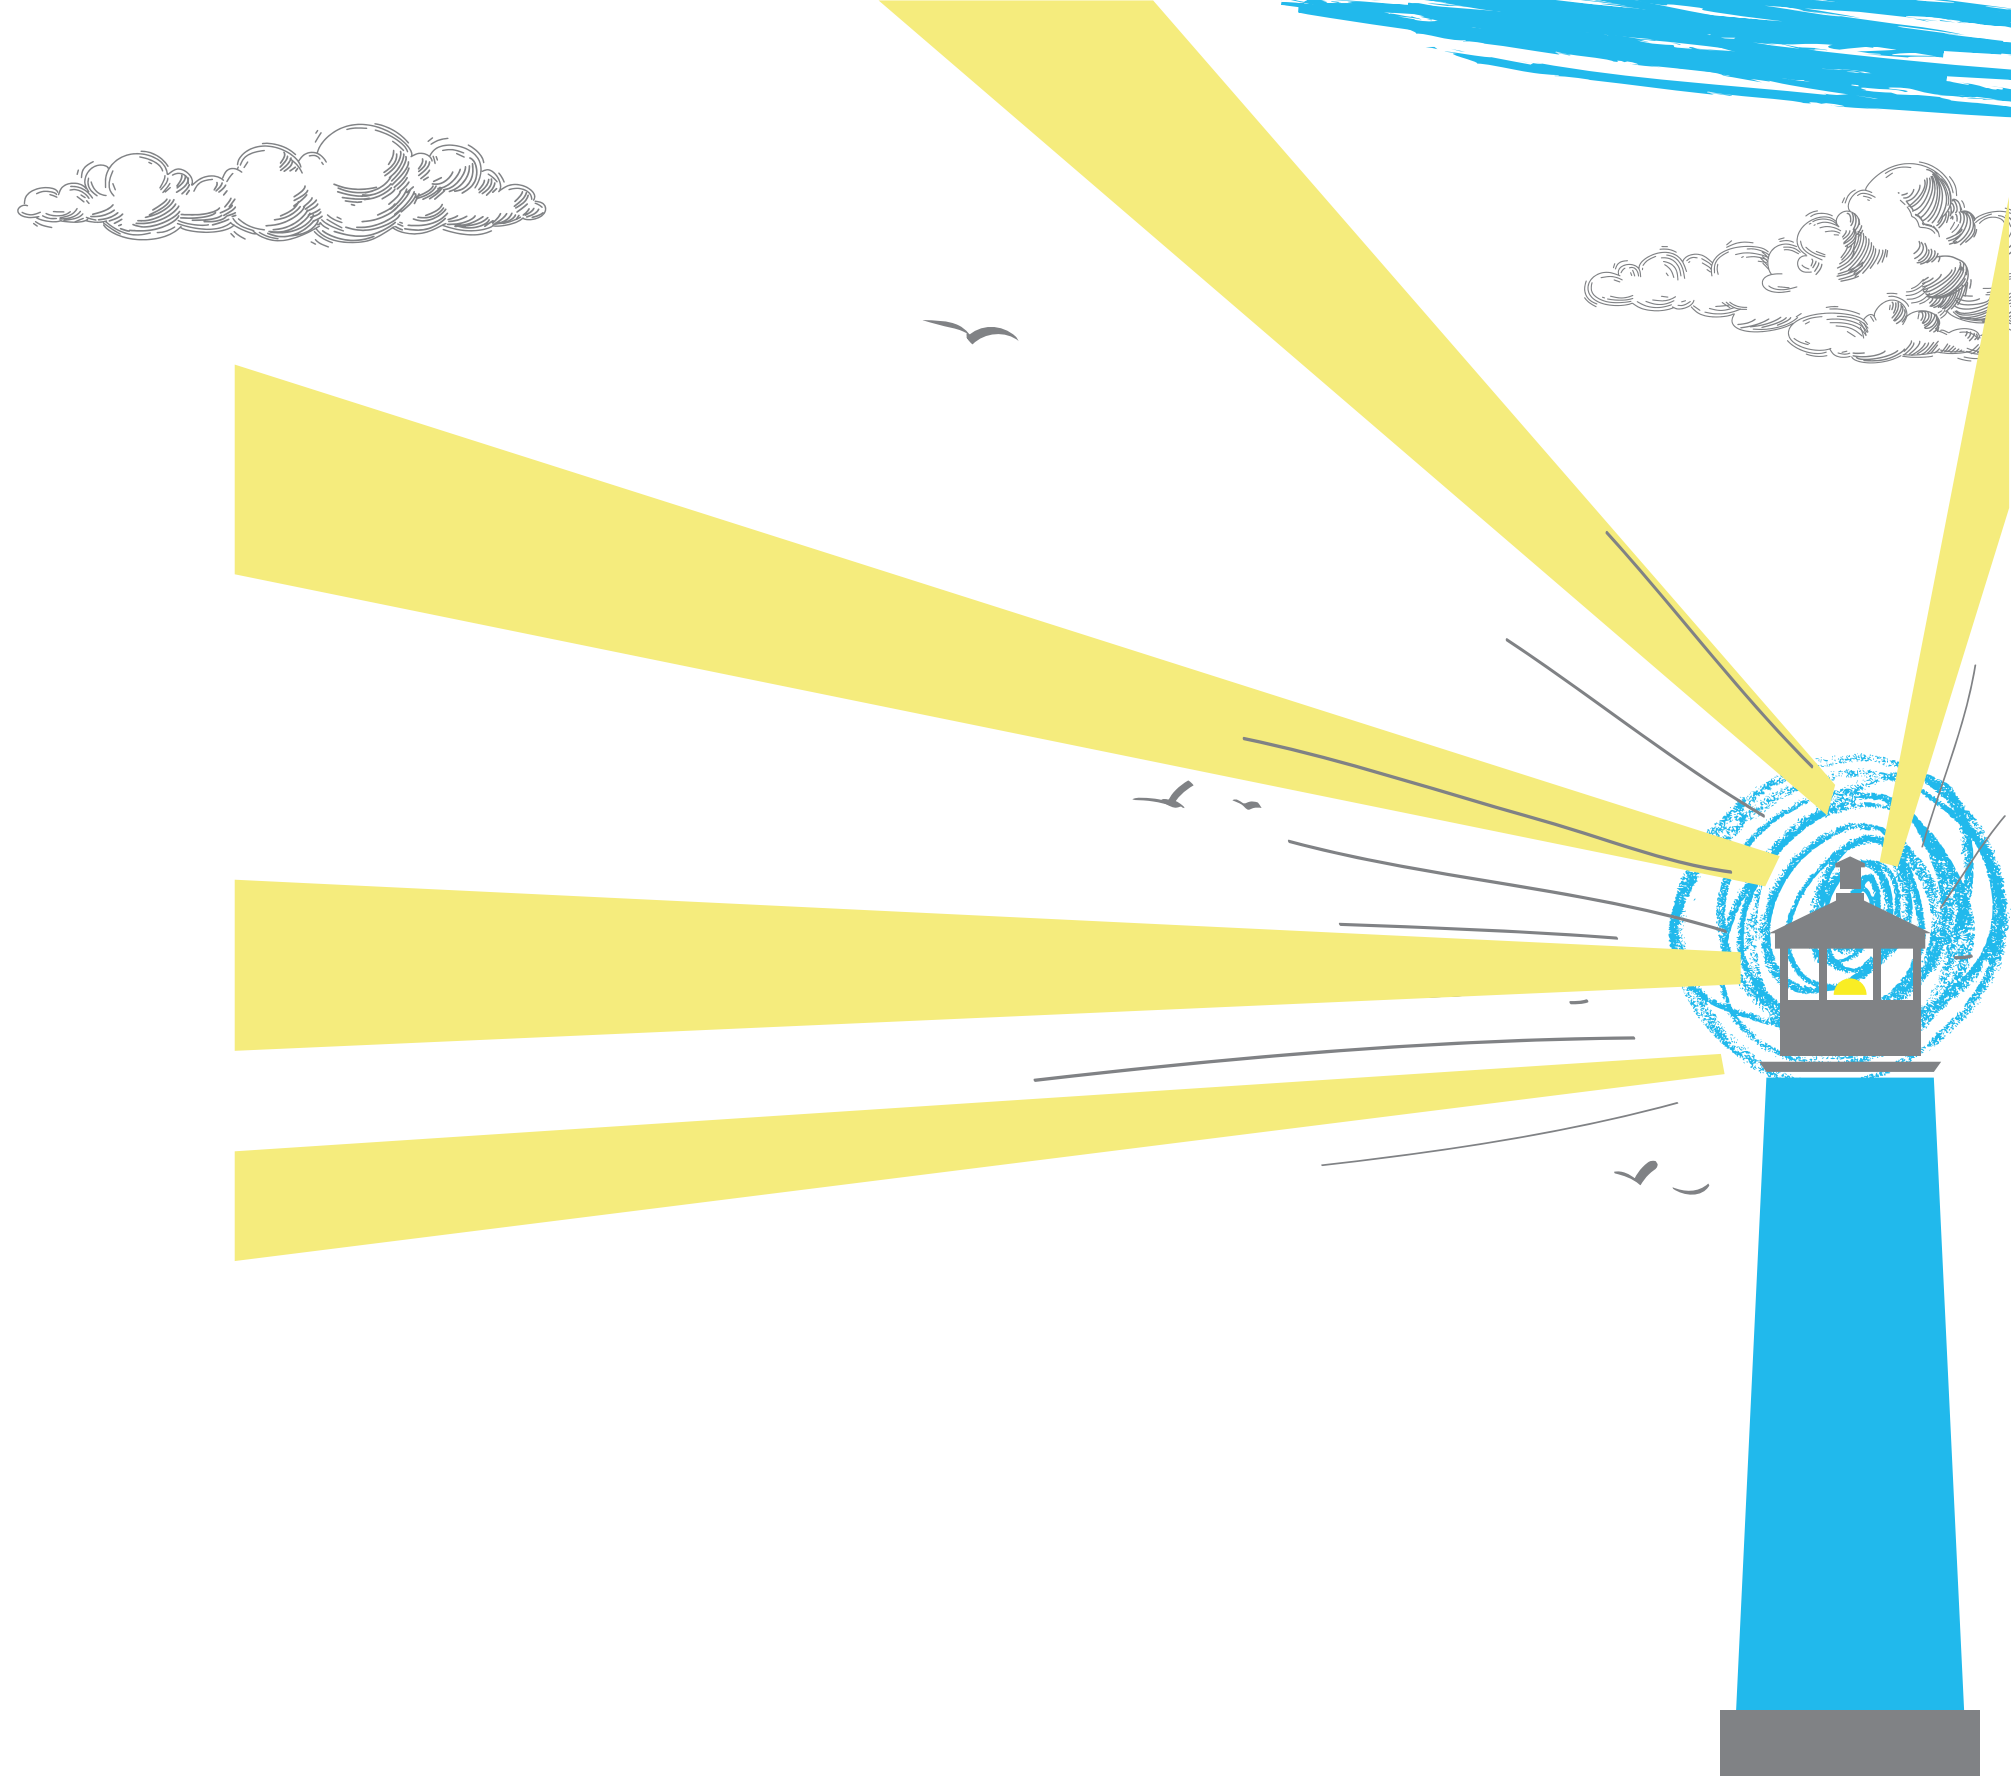

Beaconhouse began its journey in Lahore, Pakistan, in 1975 as the Les Angeles Montessori Academy with 19 students. What started as a single school has grown into a multi-sector enterprise, with each of its ventures built on the same standards of quality that shaped its earliest years.

Today, Beaconhouse Group operates across Education Services, Hospitality, and Energy & Technology, with a presence in Pakistan, Malaysia, Thailand, the Philippines, Oman, and the United Arab Emirates.

With education at its heart, Beaconhouse Group remains a service organisation, committed to serving students and families, guests, clients, and communities. This ethos extends to its non-profit initiatives, through which the Group continues to create lasting social impact.

Beaconhouse Group is home to more than 18,000 employees from Asia, the Middle East, Europe, Africa, and North America. It is one of the largest private-sector employers of women in Pakistan.

Shaped by a legacy of five decades, the Beaconhouse story is one of continuity and change, unfolding across communities in Pakistan and beyond. As the Group continues to evolve, it remains grounded in its purpose, strengthened by the diversity of its people, and committed to contributing meaningfully to society.

WE HOPE TO HEAR FROM YOU SOON.
